

Supplement Figure S1 for the article: Thingstad, P.G., Daverdin, M. & Speed, D. M. 2018. Modelling capercaillie (*Tetrao urogallus*) lek sites distribution and their limiting factors in a central Norwegian managed forest landscape. *Ornis Norvegica* 41: 1–12.

Supplement Figure S1. Maxent tuning output. Delta AICc (the difference in AICc from the model with the minimum AICc) shown for the range of regularization parameter between 0.5 and 4, and for the combinations of feature classes allowed. The model with minimum AICc was that with regularization parameter of 2.5 and linear and quadratic features allowed.
